Coping with Lift:
Baby Boomers and Beyond

The challenges of life and the coping mechanisms that we use change over time. These coping methods may positively support or negatively impact the quality of life. The media and social organizations typically focus on younger people, leaving older adults to figure out these issues with little knowledge or support. Kathryn McKinley, BVU Assistant Professor of Social Work, will talk about the views that older people hold about the challenges of their lives and their coping mechanisms. This will be an interactive based lecture. Feel free to share concerns, comments and questions with the group!

Date/Time: Monday, March 8, 3:30-5pm
Location: United Methodist Church Sanctuary
